

MPC	MAC	MVA	MVB
NSE	0.657	0.522	0.622
PBIAS	-1.28	6.1	-5.3
R^2	0.586	0.627	0.615

Key: MPC is model performance criteria; MAC is model performance after calibration for farm A; MV model verification (A-farm A and B-farm B). NSE is Nash-Sutcliffe efficiency; PBIAS is Percent Bias and R^2 is Coefficient of determination.
